## Your quiz night guide

**Thank you for choosing to support Sparks Charity by holding your own Quiz Night. Hopefully, you'll find everything you need in this pack to make your Quiz Night a huge success.**

Sparks raises money to fund pioneering child health research across the UK, helping to find new treatments and cures for children and families who desperately need them.

Bailey had a complicated birth and spent the first week of his life in a high dependency unit.

When he was born, he was blue and the umbilical cord was wrapped round his neck. He also had dystocia which meant his shoulders had been stuck. "The first time I saw him," says dad Jad, "he was battered and bruised." Despite his difficult start, Bailey has made a full recovery and inspired dad Jad to run the London Marathon for Sparks.

Evie was born nine weeks premature and has severe eczema. It's a daily battle to manage her condition and she still sees Sparks-funded Professor Somnath Mukhopadhyay at the Brighton and Sussex Medical School who is investigating what causes children to develop an allergic disease.
